**MILLENNIUM DIGITAL MEDIA SYSTEMS, L.L.C.
SUBSCRIBER ACKNOWLEDGEMENT REPORT
SEPTEMBER 22, 2005**

NOW COMES, Millennium Digital Media Systems, L.L.C. (“Millennium”) and pursuant to the Enforcement Bureau’s Further Guidance¹ in this matter files this Subscriber Acknowledgement Report.

A. Compliance with Notice and Warning Sticker Requirements

Millennium, as explained in its August 10, 2005 filing,² has provided the required notice and warning stickers to its customers since implementation of the service and thus provided the required notice and stickers to 100% of its customer base by the July 25, 2005 deadline.

B. Percentage of Customers that have Submitted Affirmative Acknowledgements

Millennium has received affirmative acknowledgments from 99% of its customer base. Millennium is awaiting responses from less than 10 customers and anticipates receiving affirmative acknowledgements from the remaining few customers, thus achieving 100%, within the Commission’s September 28, 2005 timeframe.

¹ Public Notice DA 05-2358, *Enforcement Bureau Provides Further Guidance to Interconnected Voice Over Internet Protocol Service Providers Concerning Enforcement of Subscriber Acknowledgement Requirements*, Released August 26, 2005.

² Millennium Digital Media Systems, L.L.C. Subscriber Notification Report, filed August 10, 2005, *In the Matter of IP Enabled Services and E911 Requirements for IP –Enabled Service Providers*, WC Docket 04-36 and WC Docket No. 05-196.

C. Description of Plans if Customer Does not Submit Affirmative Acknowledgement

Millennium plans to continue sending additional e-mail notifications, letters and personally calling customers to obtain affirmative acknowledgements from the remaining few customers. Millennium has the ability to suspend service using a “soft” disconnection whereby the customer would only be able to place 911 calls or calls to Millennium’s customer service center. Millennium however agrees with and supports the comments filed by Charter Communications and others noting the detrimental impact that a Commission mandate for “soft” or “warm” disconnects would have on public safety.³

Respectively Submitted,

Millennium Digital Media Systems, L.L.C.
